*Conditions Apply
 Valid until June 30th 2016

Get your business up and running and receive **10% OFF** on any of our packages!

THE FUTURE IS NOW

Virtual Office Reality

When business calls for flexible work hours, virtual offices create an opportunity for people to work whenever they like from wherever they are.

Not only do virtual offices allow for no commute time, low to no technology costs and lower overhead costs (with no lease to pay), having remote workers also cuts down on commute time, increases productivity, and produces a lower turnover rate.

Rather than booking office space, hiring a receptionist, purchasing office equipment, furniture, and phone and fax systems; a virtual office is simply a turn-key business office.

For a couple of dollars per day you can receive all the components of a serious business; a dedicated business line, a receptionist to handle all calls, a business mailing address, personalized voice mail and more.

A growing number of employers operate mostly or entirely virtually, thanks to instant messaging and collaboration tools.

A virtual office is the best way to ensure that all the daily operations of a business can be handled from anywhere around the world!

Have multiple addresses and locations all around the world allowing your business to portray a multinational presence, whilst you conduct your business from the comfort of your own home.

Get your virtual office started today from as little as \$25.00 per week!
